

Today, physical fitness is important to everyone!

Whether your personal choice of exercise is running, walking, jogging, biking, swimming scuba diving or working out at the gym, for most they all produce some of the same results - tired, aching muscles.

Now, with your own spa from the Fitness Series by Premium Leisure LLC, aches and pains can be eased tremendously. After a strenuous workout, immerse yourself into warm, swirling, pulsating water and relax your aching body. You'll actually look forward to exercising when you know you'll be enjoying your own spa when your workout is over.

Join the hundreds who have added a Fitness model to their home and experience all the pleasures these compact, powerful hot tubs have to offer.

The Stamina and Vitalizer can be plugged into a 20 amp dedicated line. The Endurance, because of its oversized deluxe equipment, requires a 50-amp 240V connection.
